

## MARDERfix spray

For use on vehicles, carports, attics

Article no.	06520
Content in ml	300
Product diameter in mm	55
Product height in mm	210
Weight pcs. in g	330

### Marten repellent spray for use on vehicles, carports, attics, etc.

Protects against marten bites. The marten's highly sensitive nose is irritated by special odorous substances that smell like the "enemy". This signals danger to the marten so that it will avoid the sprayed area. Also offers protection from rodents. MARDERfix spray is particularly easy to use. Spray the product on all vulnerable areas, such as cables, hoses and insulation materials, both in the engine compartment and in other possible hiding places. Repeat the application regularly, especially after rain or car washing, to ensure lasting protection.

#### Application

Before using any marten repellent measure, the marten's scent mark must be removed. MARDERfix pre-cleaner is recommended for this purpose.

##### 01 Pre-treatment with pre-cleaner

Spray the cooled engine compartment and wheel arches generously with the foam from the marten repellent spray (point of attack for other martens).

##### 02 Rinse with water

After a short exposure time, rinse off the foam thoroughly – for example with a watering can. The vehicle is therefore neutral.

##### 03 Application of defense spray

Spray the entire engine compartment and wheel housing generously with the repellent spray, especially the vulnerable parts. Repeat every 14 days.

#### Note

Do not spray inside the car! Spray distance approx. 20 cm.  
Use biocide safely. Always read the label and product information before use.
